

*****BIOMEDICAL EQUIPMENT TECHNICIAN I/II (BMET I/II)
WALLINGFORD, CT & FIELD SERVICE – FULL TIME**

NovaMed Corporation is seeking a full-time mid-level BMET to proficient in repairing and maintaining variety medical equipment in healthcare environments. This position is initially based 4 days per week in Wallingford, CT, with one day per week supporting other area clients, and may require occasional travel outside the area. This position offers occasional paid overtime, reporting to the Biomed Supervisor. Qualified candidates, who are authorized to work in the United States, are encouraged to apply.

Responsibilities include, but not limited to:

- o Performing routine repair & preventive maintenance on standard biomedical equipment such as:
patient monitors, defibrillators, pacemakers, blood pressure transducers, television systems, patient care computers, patient beds, blood-gas analyzers, electrocardiographs, etc.
- o Inspecting, testing, calibrating equipment, devices & systems – including life support equipment
- o Running diagnostic programs and interpreting results
- o Performing safety tests to ensure patient and staff safety related to electrical/mechanical hazards
- o General troubleshooting and problem resolution
- o Preparing timely and accurate documentation
- o Following policies, procedures, protocols, regulatory standards & codes
- o Maintaining excellent customer & vendor relationships
- o Attending and participating in meetings as appropriate (safety committees, state inspections, etc.)
- o Entering data and producing reports in computerized systems
- o Providing verbal and written reports to management
- o Demonstrating and explaining appropriate operation of equipment to client personnel
- o Maintaining equipment and documentation to meet Joint Commission and other regulatory standards.
- o Assisting with maintenance of accurate equipment inventories

Your resume should demonstrate your qualifications:

- o AS Degree: Electronics/Biomedical/Related OR Relevant Military Training
- o BMET I (minimum) experience - 1 or more years working as BMET with increasing responsibilities in hospital or field service environment, on a variety of medical equipment
- o Knowledge of basic electronic principles and ability to interpret technical diagrams for a variety of devices
- o Understanding of basic anatomy and physiology related to functions of biomedical equipment
- o Good English language skills to communicate effectively with all levels of internal and external staff
- o Basic PC software proficiency (MS OUTLOOK, WORD, EXCEL preferred)
- o Good references and demonstrated quality customer service skills
- o General knowledge of Joint Commission standards, other regulations, healthcare safety protocols, etc.
- o History of attention to detail and on-time paperwork completion
- o Ability to work successfully independently, and to perform effectively as a team-member

In addition, this position requires:

- o Ability to report reliably to work, with minimal supervision.
- o Reliable personal transportation, with appropriate level of insurance for business use.
- o Good manual dexterity & hand-eye coordination to work with small parts, tools, etc.
- o Color vision to determine wiring and other safety coding.
- o Ability to lift, move up to 50 lbs. equipment, tools, etc.
