

BMET / OR SPECIALIST – Plattsburgh, NY

We are looking for a **BMET/OR Specialist** for one of our clients, a 200-bed hospital site in **Plattsburgh, NY**, which is part of a large six hospital network servicing Northern New York and Vermont.

This **BMET/OR Specialist** will be responsible for servicing general and various types of medical/patient care equipment, including anesthesia and surgical units. Will repair, service, calibrate, and maintain a wide variety of equipment. The maintenance of these devices includes troubleshooting to component level and routine periodic inspections. Will perform initial acceptance inspections on medical equipment; provide technical support to the Nursing staff and equipment operators; and perform other related duties as required.

Qualifications:

- Minimum of an Associate's Degree, or equivalent trade school or military certificate in electronics technology or biomedical equipment technology.
- 5-10 years of experience servicing general biomedical and OR equipment.
- Experience on Datex Ohmeda Anesthesia Units and Valley Lab Electrosurgical Units (ESUs).
- Effective English communication skills (both verbally and in writing).
- Excellent customer service skills.
- Computer literate; Microsoft Office Applications and software application programs relating to documenting and servicing equipment.

Responsibilities

- Perform major and minor repairs on equipment as assigned.
- Apply good problem-solving skills in a variety of situations.
- Perform and complete preventive maintenance assignments in accordance to the Medical Equipment Management Plan.
- Submit accurate and timely work orders in accordance with departmental policies.
- Perform assigned duties in accordance with manufacturers' recommendations and other established policies and procedures, including scheduled maintenance, equipment inspection, repairs, adjustments, calibrations and safety testing of specialized classes of biomedical equipment, including anesthesia and surgical units.
- Utilize office automation hardware, software and diagnostic service software appropriate to the equipment being serviced.
- Investigate safety issues, hazards and equipment incidents.
- Work with key clinical leaders on decisions for complex repairs of high-end biomedical equipment.

If you are interested and qualify, kindly send your updated resume to Lynn Fernandez at lfernandez21073@gmail.com in a Word or PDF format. Once received and reviewed, you will be contacted immediately.

Remember, we will also consider referrals!

All candidates must be residing in the U.S. to be considered for this opportunity
